REASONS FOR ALLOWANCE

Examiner acknowledges a submission of the amendment and arguments filed on June 15, 2005. Claims 31 and 36 are withdrawn; Claims 20 and 24 - 26 are amended. New Claims 46 and 47 are added. Examiner accepted US Patent 5,548,135 as a replacement for the Japanese Patent Application 11 - 505374. Amendment and arguments have overcome rejections under 112, 2nd paragraph and 103(a).

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

1. This application is in condition for allowance except for the presence of claims 29 to 45 non-elected without traverse. Accordingly, claims 29 - 45 have been cancelled.

The following is an examiner's statement of reasons for allowance:

An amended independent Claim 1 discloses, inter alia, an inter-circuit signal wires different from said power lines, arranged to interconnect said two internal circuits, wherein said inter-circuit signal wire is not directly connected to said external signal input/output circuits; and an inter-circuit auxiliary wire, different from said power lines,

connected to a static area near a location at which said inter-circuit signal wire is connected. The closest reference for the Claim is Toyoda, which discloses some of the claim limitations, such as the integrated circuit having a plurality of internal circuits (elements 12 and couple of I/O transistors in the upper left corner in Fig.6) arranged internally in a circuit forming region, the internal circuits-having different power lines (elements VDD1 and VDD2 in Fig. 2A and 2B); an inter-circuit signal wire different from the power lines (element 17 in Fig. 6) interconnecting the couple of input transistors with one of the internal circuits. It further discloses and an inter-circuit auxiliary wire an inter-circuit auxiliary wire (the wire connecting VDD to the upper left cell 21 in Fig. 6). However, this element does not fit the claim limitation of the inter-circuit auxiliary wire being different from the power lines. Additionally, the inter-circuit signal wire of the reference (element 17 in Fig. 6) does not fit the claim limitation of the inter-circuit signal wire being not in directly connected to the external signal input/output circuits.

Allowability resides, at least in part, in the above-described limitations, which has not been disclosed in the Prior Art in a search.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
